## Eurovent **FLEX LINE**

### Application:

Strip designed for use as finishing element for chimney flashing. Ensures proper sealing of the critical spots around chimney and esthetic finishing of the roof works. Installed on the edge of chimney flashing tape with the use of fast screws. Application of roof sealant is recommended to ensure water-tightness of the upper part.

### Storage / transport:

The product should be stored in a dry place, under cover, free from moisture and UV radiation in original undamaged and closed package. Rolls should be transported in covered means of transport. They should be prepared for transport in a manner that protects them from damage and destruction. During transport safety regulations must be observed. The product should be protected from chemical agents, in particular solvent based substances, as they can reduce technical parameters of foil or permanently damage it.
